**GENERAL INFORMATION**

**SALE LOCATION:** Decorah Sale Barn - 2123 Madison Road, Decorah, IA 52101. Decorah is located 50 miles south of Rochester, MN; 80 miles east of Mason City, IA and 80 miles north-east of Waterloo, IA. All of these cities have regional airports.

**MOTEL ACCOMMODATIONS:** Super 8 Motel (Hwy 9 east). Phone: 563-382-8771. Quality Inn (Hwy 9 East). Phone: 563-382-2269. Country Inn & Suites (Hwy 9 West). Phone: 563-382-9646. For a great steak: Stone Hearth Inn, behind the Super 8, 811 Commerce Dr. Fairfield Inn & Suites, 1 mile from sale bar 563-382-2269.

**INSPECTION OF CATTLE:** Cattle will be available for inspection starting February 2 at the sale barn. The cattle may be viewed at the farm anytime prior to the sale; call to make arrangements.

**HEALTH:** Interstate health papers will be furnished on all cattle selling by Dr. Michelle Christianson. All bulls have been vaccinated two times with Bovishield and one shot. Twice with Bar vac 7/ haemophilis. They have been PI tested negative and poured in September, December and January for lice and worms.

**SPECIAL NOTES:** Scrotal measurements will be updated on our website prior to the sale. They will be actual never adjusted!!! Carcass EPD adjustments will also be updated following ultrasound on our website prior to the sale. Homo Polled and Homo Black tests along with low density genomics have been run on a number of bulls to provide more detailed information. Check our website for this information if it is not already posted within the individual lots.

**SIGHT UNSEEN PURCHASE GUARANTEE:** We will guarantee satisfaction of sight unseen purchases providing you call prior to the sale so your needs are met completely.

**Payment:** CASH - Please settle for cattle promptly.

**TERMS & CONDITIONS:** All cattle sell according to the standard terms and conditions of the American Simmental Association.

**TRUCKING:** We will guarantee no more than \$200 delivery on purchases providing delivery accommodations are arranged by Springers Simmentals. Out of state buyers please contact me prior to the sale.

**LIABILITY:** All persons attending this sale do so at their own risk, legal or otherwise for their safety or the behavior of the animals. The Owners, Auction Service and Sale Staff assume no liability for property loss or any accidents that may occur.

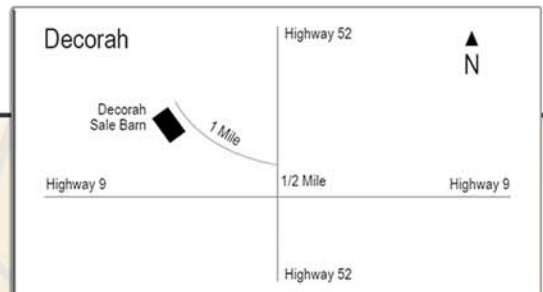

**ANNOUNCEMENTS:** From the block will take precedence over the catalog. Buyers unable to attend may send their bids to the Auction Service, Field Representatives or Auctioneer.

**LUNCH:** Complimentary lunch will be available sale day at noon.

*Bulls will be semen checked and scrotal measured by AA Breeders, Jan Van Tander, prior to the sale. Data will be online with a supplemental sheet available. We will reserve 30% semen interest on all bulls selling. Contact Jeff for more details or concerns.*

*Bulls picked up sale day will receive a \$100 discount. Free trucking will be available sale day to the Green Bay, WI and Chandlerville, IL areas. All bulls will be unconditionally guaranteed and delivered free of charge for the first 150 miles around May 1st. Insurance is recommended on bulls left at the farm as we will not be responsible for injury.*

DV Auction information located on Page 2.

Welcome to our sale of Value Based Genetics! I would first like to thank all of our returning as well as new customers for your confidence in our program. We strive to produce trouble-free, profit enhancing cattle with longevity to add value to your cattle enterprise.

Indexes and genomics have inundated the cattle genetics world, and like most things in life, have great benefits as well as some blind spots. If there were EPD's for everything our sale catalogs would be as thick as the New York phone book! With indexes and EPD's historically having low accuracy on virgin animals we believe in a balanced approach to raising seedstock, as there is an incredible amount of detail that affects the final profitability of a cattle operation. We strive for cattle that require minimum maintenance and are consistent in their birthweights with better than average growth. In a nutshell, pounds pay the bills but you can only sell a live calf.

I would encourage you to study our videos and pedigrees as there are certainly some bulls and females in this year's lineup that offer outcross opportunities to greatly improve your cattle operation and profits! We guarantee satisfaction with your purchase and will do everything in our power to make sure our genetics add value to your program. Keep in mind our sight unseen buyer guarantee and consider giving us a call in advance of the sale so we can fulfill your needs with the right individuals. We pride ourselves in excellent customer service, so buy with confidence that these bulls will make a positive contribution to your cattle operation.

Lynda and I were fortunate enough to celebrate our 40th wedding anniversary this year. For our honeymoon 40 years ago, I borrowed \$360 against my last summer paycheck; we took my '68 Ford truck with an insulated topper and decided to go to Mount Rushmore to hike around and camp for a week before heading back to Iowa State and to our jobs. Well, I managed to break my ankle about a month before our wedding so there went the hiking, and the first night of camping it poured down rain and of course our topper leaked, so we slept in the cab of the truck. The truck didn't have air conditioning and the third week in August was over 100 degrees every day. The good news is we stayed married. The bad news is Lynda has never camped again. I did, however, convince her to venture back West to the Black Hills with our kids and grandkids this fall to celebrate our milestone anniversary. It was the most fun trip that Lynda and I have ever taken and we all had a wonderful time. And no...we didn't camp.

Paisley Grace is 2 ½ going on 4, both in size and smarts. She loves the cows, the horses and the 4 wheelers. She is always eager to help Lynda with baking cookies, which I don't really mind as someone has to eat them.

Steve and Brianna are fantastic parents and now Steve has an appreciation for a little one that never stops moving, doesn't sleep much, and is extremely headstrong. It always follows the genes. Steve continues at Target Headquarters and Brianna with the National Marrow Donor Program.

Elijah Todd is a bit past 2 now and likes anything that involves a ball or wheels. He is football crazy and loves to run and jump on grandpa like he is tackling me. Of course that is a great reason for tickling and boy, can he giggle. He's also a critter kid, but prefers to ride on a tractor all day long.

Todd and Michelle are also fantastic parents. They are expecting their second child, so by sale time we'll have another little one. Michelle is now co-owner of the Elkader Veterinary Clinic and Todd continues work with York Risk Services Group. We appreciate all that Todd does with "On the Hoof Media". Continue to watch our website and Facebook page for Todd's videos and updates.

Lynda swears she will retire someday from her work with the State of Iowa but following my lead never gives a date. She loves to babysit grandkids and jumps at every opportunity. Mostly, she takes really good care of me and for that I am truly thankful!

I am so fortunate to have the love, help, and support of my family. As a father, it's especially rewarding to see my kids succeed and I'm very proud of all their accomplishments. Special thanks to Lynda for making me a better person and for the great meal today!

Our production partners have the same goals and commitment to producing superior seedstock that we do. Please take the time to get to know each of them. I would like to extend my thanks for all their hard work and dedication toward producing some of the best seedstock available in the industry today.

*The Springer Family*

**The sale will be broadcast on [www.dvauction.com](http://www.dvauction.com). See page 2 for more information.**

**L to R: Alex, Maddie and Erin**

Our list of helpers continues to grow and Lynda and I appreciate all of them. I'm not sure how many pies the kids have conned Lynda out of this year but I would guess it is approaching 30. I certainly don't mind and Lynda loves to bake and has a lot of fun with all of the kids. She tends to kind of adopt them which is great for all.

Natalie Knobloch is now a junior at ISU pursuing a degree in elementary education. She recently won showmanship at Block and Bridle's Little I where you show multiple species. Congratulations Nat, well done!

Alex Hansen continues at Farmers Coop in Wykoff, MN. When crop work slows down he is Johnny on the spot for cattle activities. Alex is always smiling, hardworking, and a great young man.

Maddie Fitzgerald was off to ISU this fall and the quiet was deafening. Her "Photography by Maddie" business is growing and keeping her busy 24-7, which is what she likes. Maddie wants to learn how to be a ring man this year so we will see if Tom Rooney can tune her up a bit.

Erin Ryan started this fall breaking the bulls and heifers and is really calm around them which they really respond to. She is also pretty quiet, which Mike and I have both agreed has taken some getting used to after having Maddie around the past few years. She is doing a great job and we are looking forward to her continued help in the future.

Mike Wilson has fully recovered from his cancer operation last year and continues to feed and treat the cattle like they are his own. On Wednesdays Joel, Mike's grandson,

is without a sitter so has been coming out to help Mike feed the cows. You can tell they both love it and really enjoy spending time together. Thanks for all the years of help Mike! We couldn't have done it without you.

I would especially like to thank the Kimball family for all of their help in Denver and with sale preparation! It takes a tremendous amount of effort to make this all work and I could not do it all without their help. With good people good things happen and I am fortunate to be surrounded by some of the best! Thanks to their whole crew for all of their hard work and support.

As always, all of the cattle selling are guaranteed to perform as expected or we'll fix it to your satisfaction. We encourage everyone to take advantage of our hospitality and join us Friday or Saturday for a showing of the bulls or tour of the cowherd.

Lastly, and most importantly, please remember our servicemen in your thoughts and prayers as they continue to protect our rights and liberties. We look forward to seeing you February 3rd!

Insurance  
Equine &  
Livestock

XL CATLIN

## Bull Mortality & Infertility Insurance

To protect your investment, Caitlin Insurance will be offered on your livestock purchase. It covers many of the hazards to a bull, including foot rot and injury that mortality insurance does not. We will pay 3% of the premium on your choice of policy, and if leaving your bull until May 1st would require at least the inexpensive policy be purchased. A representative will discuss

different options just prior to the sale and answer any questions you may have. Springer Simmentals will continue to warranty your bulls for disposition, sound feet and legs and breeding soundness just as we have in the past. Sincerely, Jeff Springer

• These maternal brothers to SAS Bruzer and Lots 35-39 have put together a string of impressive accomplishments. Big powerful individuals with tremendous bone, feet and excellent rib shape. Bruzer has been the go to heifer bull at R Plus Simmental as well as Graesser Ranch for calving heifers. The resulting females in production are consistent, easy fleshing, beautiful uddered females with excellent production. We consider consistency a huge profit factor and you will notice all of the Licorice progeny are of high quality and performance. I'm excited to get semen on these guys and put it to use. I would expect great things!!!

- Individual Performance: BW 80 lbs, BWR 112, WW 709 lbs, WWR 96, Adj. YW 1397 lbs.
- E208 stems from the Barbie donor, now owned by Jenkins Cattle company, Gary and Marnie Jenkins. She is a beautiful yet massive cow. E208 certainly maintains the massiveness, with a big hoof and tremendous hip. A super quiet individual that stood perfect the 1st time he was tied. I love big hips so one of my personal favorites. All this in a very moderate package.

- Every time I see this bull from a distance I say WOW, and this is expected as his mother does the exact same thing. Y502 stems from the 354N donor that is in the sale. Her daughters are all trouble free, easy fleshing, gorgeous females. This cow family has played a tremendous role in our production females. E502 maintains tremendous stoutness along with all of those good looks. The maternal strengths of this bull will be phenomenal.

- Individual Performance: BW 71 lbs, WW 790 lbs, Adj. YW 1282 lbs.
- High Worth is a SimAngus™ bull needing serious consideration. His dam is a proven donor and true powerhouse. She is a full sister to the champion bull at the 2010 Midland Bull Test. Very rarely a tour is given at the farm where the stature of what we truly believe is one of the best Net Worth daughters in the country goes unnoticed. A true ground pounder, and when power comes to mind, she has endless ability in a light birth weight package.
- The dam is also the maternal sister to the 2012 high-selling \$32,000 female RB Lady Contrast 308-850 selected by Crouch Angus Valley, Glenwood, IA.

- A maternal sister sold to Belle Point Ranch, AR for \$19,500 at the 2013 NWSS for Pasture View Angus, IL.
- Six maternal sisters sold for an average of \$11,650 to THM Farms, MO, Sioux Pass Angus, MT, and Gary Wall, MT.
- Maternal sisters to the dam sold for \$25,000 and \$13,000.
- A maternal sister, RB Lady Product 988-2988, sold in the 2013 NWSS Sale for \$6,600 to Brand Angus, MN.

- This baldy bull stands out in any crowd. Like all the Renowned calves, he's got tons of hip, length, and growth. This guy has been fun to watch grow, always caught my eye in the lot. On a recent trips to Jeff's I stopped and said what's that bull? It was E435, not to toot my own horn but proud to have raised him. His dam traces back to shear force and mo better, and she herself was a top seller at Felts Foxy Ladies Sale. Look at the CE and BW numbers, if you have some heifers that need a standout cleanup bull I'd raise my hand on this one.

- I apologize for talking about females quite so much!! I breed for the next great female and let the bulls take care of themselves. Also the Bitten calves are exceptionally uniform and I can't say the same thing about every one. The B207 female is exceptional for structure and shape. A daughter of the X207 "Sugar" female. Probably should have been in the Denver pen!

Steve & Boni Hanson and sons

## Steve Hansen Family

Several years ago we were looking for a purebred breed to go on our Angus/Angus cross cows. We decided on Simmental and ended up at Jeff's sale that year. We purchased our first Sweet Meat son. We have owned several bulls from them and even have purchased a few for other people. We were looking for calves that come easy at birth and have that extra vigor to get up and nurse on there own. We have not been disappointed. The calves have always weaned easy and really grow. An added bonus the bulls are easy keepers and need very little special treatment. We sold a 6-year-old bull this past July who had always bred 25-30 cows and hadn't had a mouth of grain or silage in three years and weighed 2300 lbs when sold. Jeff, his family and crew are true commercial cattlemen's supporters where good, sound cattle and pounds pay!!!! Thanks! - Steve Hansen

- Different twist to our pedigrees, back to a fantastic daughter of SAS All Star. Just a first calf heifer, she produced as expected. Big time growth in a moderate framed package.

## Jason Hansen Family

Front: Jaxson and Jase.  
 Back: Shaylee, Marisa, Jason, and Dayton

When describing Springer Simmentals, the best word I can use is longevity. The program and genetics, both, are built for long term stability and profitability. I have known Jeff for over 20 years and continue to be impressed with the females in his herd. Many continue to stay productive for 10-12 years or longer. Meaning they calve on time, wean heavy calves, and breed back to do it all over again. The cows have excellent udder quality and are super docile. Simply put, these cattle work, and sell themselves. If you're looking to advance or enhance your program, I would strongly consider the Springer Simmental program!

- Jason Hansen

• We don't creep feed, so don't penalize these brothers for having a recip mother that does not have years of selection pressure placed on her to improve her production. These guys have all exploded after weaning and continue to develop into fantastic herdsire prospects. They are big hiped with far above average rib shape. Sons of the Licorice cow have outproduced themselves everywhere they have been used. They will all be female makers and offer excellent growth.

# Springer Simmental Herd Sires

## SAS SWEET MEAT

Owned with Hart Farms. Superior producing females, stout bulls

## R PLUS KING OF THE YUKON

Owned with Denning Farms, Little Sioux Cattle Company, Jon Weaver. Massive feet, great bone, tremendous capacity and fleshing ease.

## SAS APOLLO A302

Owned with Jenkins Cattle Co, Gary and Marnie Jenkins, Moultrie, GA. Phenomenal and powerful hipped cattle. Great females!

## R PLUS RELOAD

US Semen rights owned with Gunn Simmentals Michael Gunn and Denning Farms, Mike and Robyn Denning. Huge crest and large scrotaled for improved fertility. Power and Power!

# Springer Simmental Herd Sires

## SAS BRUZER

Owned with R Plus Simmentals and Graesser Brothers. Awesome females, perfect udders, easy calving.

## BULL BENEFITS

- Disposition, disposition, disposition.
- Calf vigor second to none!
- Uniform birth weights of stout, aggressive calves!
- Superior growth as feeders and in the feedlot!
- Daughters are replacement females you can bet the farm on with mothering ability, beautiful udders and fleshing ability built in.
- Maximum hybrid vigor expressed using pb bulls to compliment your superior cows!
- Built in carcass benefits that improve marbling, ribeyes and lean yield!

## ERIXON BITTEN A203

Additional bone with huge feet. Extremely attractive, excellent growth. Huge topped cattle with large REA's. Very short gestation length cattle, yet powerful calves!!

## SAS RENOWNED

Owned with Bar QH Cattle, John and Alicia Sandidge. Calving ease, performance and eye appeal with fantastic growth.

- These baldy bulls are meatwagons! They are so similar I just decided to write to footnote together. Both these guys carry a very modest actual birthweight, but when you see them you'll be impressed with the mass and dimension they carry. This pair of bulls could really add to a herd, tie them together and cover a group of cows and come weaning time they'll be like peas in a pod. I'm proud to put bulls of this caliber up for appraisal!

- This guy's dam is a powerhouse female. Unfortunately we lost her first bull calf out of B036. No fault of hers, but this guy might be even better. She was purchased at Keller's as a top selling open and boy she's the front pasture kind. I would suspect this bull to make some beautiful females and add pounds to the feeder calves when they cross the scales.

- This bull has style to burn! Study the renowned bulls as a sire group and boy they impress. 424's dam is a beautiful upgrade female, that milks hard and breeds back, that's as important as anything in my book. Her first calf is a feature bred, and this bull is a favorite as well. She not only bred back first shot as a first calf heifer, but moved up almost 30 days!

Bred 05-05 to Bitten Sugar X207 has been a terrific producer for us. Predominately leaving a white face and always a really big hip. Her offspring are easy to sell and have that look at me eye appeal. It doesn't matter whether you wish to breed for production, showing, or great genetic values. There are bulls to make that happen and the phenotype and soundness of all of the calves will be as good as it gets. Last 3 flushes averaged 15 embryos, 9 number 1's.

Open with calf at side. We decided to flush Serena T036 after she proved her ability to produce top individuals with good genetic values. Power cows are not the norm in the simmental breed any longer, especially ones that are moderate framed and really powerful. Her progeny represented by Lots 14,15 and 80 are extremely good examples of how she produces. Last 3 conventional flushes she did 16, 22 and 20 number 1 embryos.

- Bred 7/05 to C029. Gary Jenkins found the 354N cow in our herd the year she had Apollo. I had lost track of the number of daughters we had and his research showed it to be one of our top cow families. He went on to purchase Apollo and after studying her daughters we started flushing her. Yep she's old, probably won't cost much, but almost every one of her daughters are working their hearts out in our herd. Flushed last 1 time in 2014 and produced 14 number 1's.

We purchased the 138D bull with Jenkins Cattle Company from Dickinson Ranch, Gorham, KS We needed a big numbered clean up bull for our open heifers. Dickinson Ranch is a no frills program, grazing year round and living off grass only. He ended up in the Allied catalog with phenomenal genetics values after all data was in. He is getting double duty, breeding heifers here and then now down in Georgia with cows to service. He has held up extremely well and is heavier boned and bigger footed than a typical calving ease bull.

Lot 78

- There are pieces of the Lockdown bull that I really like and appreciate and that is what breeding cattle is all about. Selecting and matching the pieces. I think the mating to either Sugar cow will offer some tremendous individuals. X207's mating to Cowboy Cut was a home run maintaining Sugar's power, bone, muscle and capacity, yet moderating frame. I would expect this mating to be just as phenomenal.

**W/C RELENTLESS 32C**  
Sire of Lot 109 embryos

- You have to appreciate the Main Event sons offered at C Diamond last spring as one of the great sire groups to sell last year. There were useful things about all of them.
- The Relentless females in sale catalogs this fall appear to have enough chest floor to make cows, yet enough look for some to make show heifers. They look to have enough hip to make me excited to see the sons this spring. I would expect sons of either mating to be bull stud caliber or donor prospects!!!

All embryos will be available for pickup at the sale or are housed at Premier Embryo Services. Buyer guarantees a 50% conception rate on all embryos offered.

- I consider Angel to be the best cow on the place. Her daughters are proving her worth, and her son C029 that we retained from a clean up bull has a couple of the top bulls in the sale. She is a no-miss cow that you will see a lot more of her offspring representing our program in the future.
- TJ High Calibre is the \$400,000 selection by Herbster Angus to benchmark their Simmental program. Great phenotype and great EPDs. I can't wait to get some on the ground. I think this will be special.
- I gave my thoughts on Relentless and Renowned does not need to take a back seat to either of the other bulls. Whatever your direction is in the beef business, one of these matings will work for you.

All embryos will be available for pickup at the sale or are housed at Premier Embryo Services. Buyer guarantees a 50% conception rate on all embryos offered.

**HOOK'S BROADWAY**  
Sire of Lot 114 embryos

- B092 and Z420 would be tied for my next favorite cows, and you may have noticed all three are Yukon cows. He can spit out some truly great ones. B092 is always more interested in eating than having her picture taken. You could set off a cannon and she would stand and look at you wondering what she should do next. Her daughter by Bitten had the highest marbling score ever recorded at Springer Simmental of 7.16 and weaned off at 696 lbs. Not bad for a first calf heifer! Not bad for a heifer calf on a developing ratio geared to a 2 lb gain. Either mating offers excellent genetic values with production and quality.

All embryos will be available for pickup at the sale or are housed at Premier Embryo Services. Buyer guarantees a 50% conception rate on all embryos offered.

• Star is the mother of Sweet Meat and still looks awesome at 12 years of age. It looks like mating Cowboy Cut to a power muscled cow like Star really makes something special. We have daughters by X207 and T036 and really like their moderation yet having the power we demand. The E797 and D036 bulls by T036, Lots 14 and 15, are pretty special. Look for yourself at what mating power with calving ease can do.

# The Turquoise Suitcase

Once again we are Denver bound  
Can't miss a turn or we won't be found.

The Turquoise suitcase rides behind  
It makes the trip, it was quite a find.

Lynda said we must  
So I agreed with some trust.

She appeared all smiles, with a perfectly matched set.  
But Turquoise? I was really upset.

How could I with any respect  
Carry such a thing without any regret?

I looked into her eyes, and knew I hadn't a prayer.  
That it could be painted, dyed, duct taped or even  
covered in hair!

40 years of marriage it has endured  
And 18 years of Denver, never detoured.

Covered in snow, even 30 below  
The Turquoise suitcase just rides low.

The girl at the desk says, "Welcome you all!"  
When she looks down beside me and about takes a fall!

Back in Denver again, to show off our wares  
And the Turquoise suitcase, has not any cares.

Retirement has come to a good friend at last  
The Turquoise suitcase is now a thing of the past.

Oh I'll miss the comments and stares as I walk along.  
Heck my kids will think I'm normal...but not for long

Goodbye old friend, its been a great trip  
Maybe Candy Apple Red, so onlookers can flip!!
