Sale Location

Decorah Sale Barn - 2123 Madison Rd, Decorah, IA 52101. Decorah is 50 miles south of Rochester, MN; 80 miles east of Mason City, IA and 80 miles northeast of Waterloo, IA. All of these cities have regional airports.

Motel Accommodations

Super 8 Motel (Hwy 9 east): (563) 382-8771. **Quality Inn** (Hwy 9 east): (563) 382-2269. **Country Inn & Suites** (Hwy 9 west): (563) 382-9946. **Fairfield Inn & Suites** (1 mile from sale barn): (563) 382-8800. **For a great steak: Stone Hearth Inn**, behind the Super 8 in Decorah

INSPECTION OF CATTLE: Cattle will be available for inspection starting February 1st at the sale barn. Cattle may be viewed at the farm anytime prior to the sale. Call to make arrangements.

HEALTH: Interstate health papers will be furnished on all cattle selling by Dr. Michelle Christianson. All bulls have been vaccinated two times with Bovi Shield and One Shot. Twice with Bar Vac 7 / Haemophilis. They have been PI tested negative and poured in September, December and January for lice and worms.

SPECIAL NOTES: All birth weights are actual birth weights. Scrotal measurements will be updated on our website prior to the sale. They will be actual never adjusted!!! Carcass EPD adjustments will also be updated following ultrasound on our website. Homo Black and Homo Polled tests along with low density genomics have been run on a number of bulls to provide more detailed information. Check our website for this information if it is not already posted in the catalog.

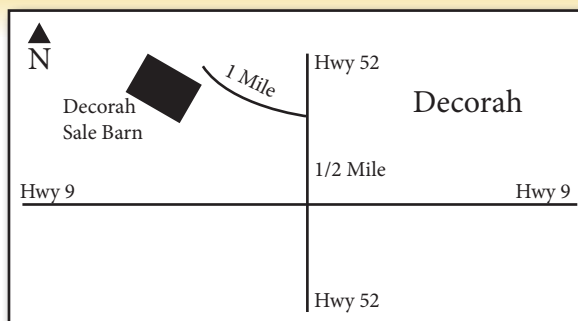

SIGHT UNSEEN PURCHASE GUARANTEE: We will guarantee satisfaction of sight unseen purchases providing you call prior to the sale so your needs are met completely.

PAYMENT: CASH - Please settle for cattle promptly.

TERMS & CONDITIONS: All cattle sell according to the standard terms and conditions of the American Simmental Association.

Trucking: We will guarantee no more than \$200 delivery on purchases providing delivery accommodations are arranged by Springer Simmentals. Out of state buyers please contact Jeff prior to the sale.

LIABILITY: All persons attending this sale do so at their own risk, legal or otherwise for their safety or the behavior of the animals. The owners, Auction Service and Sale Staff assume no liability for property loss or any accidents that may occur.

Additional Info

Bulls will be semen checked and scrotal measured by AA Breeders, Jan Van Tander, prior to the sale. Data will be online with a supplement sheet available. We will reserve 30% semen interest on all bulls selling. Contact Jeff for more details or concerns.

Bulls picked up sale day will receive a \$100 discount. All bulls will be unconditionally guaranteed and delivered free of charge for the first 150 miles around May 1st. Insurance is recommended on bulls left at the farm as we will not be responsible for injury.

ANNOUNCEMENTS: From the block will take precedence over the catalog. Buyers unable to attend may send their bids to the Auction Service. Field Representatives or Auctioneer.

LUNCH: Complimentary lunch will be available sale day at noon.

Welcome to our Sale of Value Based Genetics!!

I would like to thank all of our previous and future buyers for their confidence in our program. We strive to produce trouble free, profit enhancing cattle with longevity, to add value to our customers' cattle enterprises. This year we are offering a 5% discount for new and young cattlemen and women. They are the future of the cattle business! Please check out the details within the catalog!

We take a balanced approach to raising seed-stock, as there are an incredible amount of details that affect the final profitability of a cattle operation. We also take pride in supplying data with integrity and cattle with built-in consistency.

I hope you will study our videos and pedigrees as there are certainly some bulls and females in this year's lineup that offer outcross opportunities and genetic values to greatly improve your cattle operation and profits! We guarantee satisfaction with your purchase and will do everything in our power to make sure our genetics add profit to your operation. Remember our sight unseen buyer guarantee. Please call ahead so we can fulfill your needs with the right individuals. We take pride in our excellent customer service, so buy with confidence that these bulls will make a positive contribution to your cattle operation.

Lynda and I have had a wonderful year playing with kids and grandkids. I don't know how we ever got anything done with little tykes underfoot. I swear Noah can crawl 100 miles an hour and never stops moving. Just like another little boy I remember.

Lynda is looking at retirement, but her final date keeps moving back. I'm not sure if she doesn't want to quit, or is afraid of too much hubby time. For the record.....I absolutely refuse to make the garden any larger. I'm glad we still like each other and she continues getting prettier every day, that makes married life pretty easy!

Paisley Grace, 3 ½, is the sweetest little girl, and I am not at all biased. She thinks Grampy is wonderful and I am not going to tell her differently. She loves the cows, the horses and 4-wheelers. We have to race everywhere we go, with Eli joining in, of course. I have yet to win a race, those two can really run and grandpa doesn't have a chance.

Steve and Bri have had a wild year with Bri receiving a promotion and Steve continuing to take on more work responsibility. Basketball has started for Paisley, and you can see the excitement in Steve's and Bri's eyes for her. Steve continues at Target Headquarters and Bri with the National Marrow Donor program.

Elijah Todd is a bit past 3 now and likes anything that involves a ball or wheels. He loves to wrestle and tackle grandpa and won't quit until he is covered in sweat and his tickle is worn out. He also spends half of his time pulling up his pants like someone else I know. Grandpa taught him how to wink—so look out young ladies! He is a cutie!

Noah is already 10 months old as I write this; he is starting to walk, crawling at a run, and absolutely full of energy. He loves to bounce and get thrown into the air. His favorite pastime is eating and it doesn't seem to matter what he eats! He is already trying to keep up with Eli and Paisley, and I'm sure it won't be long.

Michelle is on her second year as co-owner of Elkader Veterinary Clinic and Todd continues work with York Risk Services Group. He received a promotion this year to Senior Loss Control Specialist. Life has been busy with work and two little boys. They are excited to be moving to an acreage in March, away from town life with plenty of room for the kids to play! We appreciate all that Todd does with "On the Hoof Media." Continue to watch our website and Facebook page for Todd's videos and updates.

Lynda loves to babysit and jumps at every opportunity. Mostly she takes really good care of me, for that I am truly thankful! I am extremely fortunate to have the love, help and support of my family. As a father, it's especially rewarding to see my kids succeed. I'm very proud of all their accomplishments. Special thanks to Lynda for making me a better person and for the great meal today.

Our production partners have the same goals and commitment to producing superior seed-stock that we do. Please take the time to get to know each and every one of them. I would like thank them for all their hard work and dedication toward producing some of the best seed-stock available in the industry today.

As always, all of the cattle selling are guaranteed to perform as expected or we'll fix it to your satisfaction. We encourage everyone to take advantage of our hospitality and join us Friday or Saturday for a showing of the bulls or tour of the cowherd.

Please remember our servicemen in your thoughts and prayers as they continue to protect our rights and liberties. We look forward to seeing you February 2nd!

Our list of helpers continues to grow. Lynda and I really appreciate each and every one of them.

Natalie Knobloch is now a senior at Iowa State University pursuing a degree in elementary education. She is student teaching in Decora, IA right now and continues to stop in for pie & ice cream and long visits.

Alex Hansen has taken a position with John and Alicia Sandidge in Chandlerville, Ill. Alex is always smiling; he is a hard worker and a really great young man. We wish him all the best with a great new opportunity.

Maddie Fitzgerald is continuing her quest to become a veterinarian at Iowa State University. Her photography business has exploded and pays much better than rinsing bulls. She is a very talented young lady who will succeed wherever life takes her. I think she can smell Lynda making pies from school in Ames, and we love that she stops in frequently to keep us up to date.

Erin Ryan, in her second year with us, has become great help. She is always smiling, which is not always easy. She is a very hard worker and has confidence to do just about anything I give her. She works smart, and did I say she is always smiling?

Erica Early is in her second year at North Iowa Community College and has returned to help us again. She is fantastic with cattle and an extremely hard worker. She must be a mind reader as she is always about two steps ahead of me. I really like that about her and think she will be extremely successful with whatever she chooses.

August Storkel enrolled at North Iowa Community College this past fall and has become our newest helper. Augie rides bulls periodically and is tough as nails. A bull kicked him pretty hard when washing for pictures, he didn't back away and still put in about 14 hours that day and the next! I was impressed.

I'm not sure how many pies the kids have conned Lynda out of this year. I would guess it is approaching 30, although I certainly don't mind! Lynda loves to bake and has a lot of fun with all of the kids. She tends to kind of adopt them, which is great for them all.

Mike Wilson continues to feed and treat the cattle like they are his own. He is very dedicated to doing a good job and always does whatever is needed, no matter how long it takes. I don't know what I would do without his help and really appreciate all that he does. Mike has really gotten into playing euchre this year, so Friday nights are reserved for that. He always has some stories to tell and claims he wins a lot!

I would like to thank the Kimball family for all of their years of help and friendship. It takes a tremendous amount of work to make this successful and we could not have done it without them. Dan and Diane are very much enjoying being Grandpa and Grandma these days. About 7 more years and the grandkids will be showing so we can do it all again!

5% Discount for Beginning & Young Producers

We believe the future of beef production lies in our youth! We are offering a 5% discount for all beginning and young producers!

Requirements

- **30 years of age or less**
- **2 bulls maximum**
- **Must be purchased for use on your cows not for a friend or relative.**
- **We would like a picture of your family for future reference.**

DENVER PEN BULLS

Lot 1

SAS BITTEN F046

The biggest topped bull I have seen in quite some time! Yet possessing tremendous rib shape and muscle. Moving freely and with good base width, he was always easy to find in pasture checks, cresting early at 2 months of age and showing the promise of power he now possesses. His mother had twins last year, but did a fantastic job with both 046F and her first calf. Top 10% API and top 4% TI combined with his outcross genetics make him a truly unique individual. Again, I would not be surprised to see his numbers increase with ultrasound data evaluation. It's rare to find this much power, performance and soundness combined with excellent genetic values, making this another bull that will find heavy use in our program!

Lot 2

SAS/BAR QH PRINCE F200

Princess, owned jointly with Bar QH Simmentals, John and Alicia Sandidge, has done a stellar job. She is a beautiful female, moderate in type and beautiful uddered. Prince combines the fantastic looks and looseness of the Broker cattle with the power and muscle of the Bitten progeny. An unheard of 919lb 205 day weight. Yet, it is understandable when you see the power and muscle this guy possesses. To really power up your next calf crop and leave you with beautiful productive females Prince would be an investment you won't want to miss.

DENVER PEN BULLS

Lot 3

GB/SAS BITTEN F727

Kevin and Rod had the worst mud they have ever encountered last spring. Really got the calves off to a slow start and he doesn't creep feed. On feed these calves have exploded and F727 is really coming into himself. This has been a high producing, trouble free cow family! Another outcross to a lot of the US genetics. You have to really appreciate this bull for his exceptional depth of body and structural correctness.

Lot 4

GB/SAS BITTEN F634

The biggest topped red bull in the offering with the most rib shape. The 634 cow family has been exceptionally consistent in Graessers herd in Dallas, SD. They are all big volume, beautiful uddered females. F634 is an outcross to all red genetics and certainly has the quality and cow family behind him to consider him a potential herdsire. Birthweights in SD are always 5-10 lbs heavier than here in Cresco. I think Kevin and Rod are just better feeders as the Angus calves are as well. This guy is really worth a look and consideration as a building block in your red herd program.

DENVER PEN BULLS

Lot 5

SAS BITTEN F443

Perfect balance and symmetry best describe F443. He excels in rib shapes, muscle, large hooves and base width. Moves extremely well yet very heavily muscled. Superior performance, great genetic values and a herdsire presence make this guy a big time herdsire prospect. OUTCROSS TO ALL AMERICAN GENETICS. This cow family is heavily represented in our herd, standing the test of time and reproduces very consistently. All family members possess beautiful udders, tremendous volume and rib shape and are very easy fleshing. I'll predict his marbling epd and consequently API will increase greatly as we have enough US genetics in the mix this year to give the Bitten calves a realistic test. He will find heavy use in our program!

Lot 6

GB/SAS 612D F168

A son of a previous high seller and Bitten son. The 612 cow family put a distinct and extremely desirable heavy muscle pattern into their progeny that allows them to stay sound. You can see by the picture how D612 maintained his flesh at the end of the breeding g season. F168 is one of my personal favorites with a puppy dog personality. He has the look of a herdsire and crested at an early age. He is line bred Sweet Meat and goes back to a really great cow from Altenburg Super Baldies. Sweet Meat progeny continue to be the gold standard to compare for overall longevity, mass and power.

Yes he sold in last year's sale, but when I delivered him the new owner only had 7 heifers to breed. I asked if I could show him at my expense to promote Bitten and he agreed, but now bought some more heifers. Consequently, he wants to get a yearling bull so E552 becomes available. Out of a full sister to the Angel donor and a really good female in her own right. If your goal is a herd of elegant beautiful females then these brothers should be at the top of your list.

I really appreciate the softness of these DS Substance calves. Really big middle, big topped. They have excellent reach with their back legs and move around with ease. F105 has really excelled in performance and has plenty of muscle. For fleshing ease and a bit less frame consider F105 to be a top contender.

We selected one of the very best Reload females from a top cow family for a donor and came up with the mother of F321. Weaning off at 797 without creep looks like we made a great choice. The calf vigor and mothering ability stands out with this cow family. They are ideal in size and type for producing herd bulls.

Here is a little different twist and comes in a baldy package. One of my favorite cows is the Z502 cow; she is just neat to look at and a real sweetheart. Not surprising as she is the result of the Sweet Meat x Yukon mating that has worked extremely well.

The Main Event cattle have unique things to offer the seedstock and commercial industry. F207 is one of the few ¾ bulls in the sale, offering a bit more Angus for those producers wishing to maintain more of that in their herds. F207 closely maintains the muscle and hip of the purebreds in a smoother made package. He has been a bull to watch all summer and has certainly exploded since weaning. He offers more hair, bone and hoof than typical of the Main Events. Benefits from the Yukon cattle.

Big time herdsire prospect. Main Event x SAS Licorice s532. Great genetic values. The Licorice cow ratios over 100 in every category. He offers a powerful hip and tremendous rib shape, walks like a cat and possesses that character or presence that a true herdsire exhibits. He is incredibly smooth made yet has enough looseness for excellent growth.

Full brother to F492 and from the same mold. Main Event adds a neat profile to his calves, and the Licorice cow adds the exceptional rib shape and power. Deep chested enough to make high producing cows and with enough hip to make herd bulls. The greatest benefit from these two brothers may be in the females they leave you with.

Like his cow family All Aboard adds lots of fleshing ease. His grand dam owned by Mineral Mountain Cattle is as powerful as can be and her Reload daughter is much the same. F395 uniquely combines top 10% API & TI while being heavier hipped than most the All Aboards and carries himself with ease and grace. All of our red bulls offered will produce black calves when used on black Angus cows. If needing a red herdsire take a close look, the cow family is exceptional.

After 4 years of use we have witnessed the valuable advantages Bitten offspring bring to the table, industry wide. Erixon Bitten offers outcross possibilities to most popular US genetics. He does that with genetic values ranking him in the top 2% API and top 15%TI. He is currently in the top 1% CE direct and top 2% stayability. He is unique; offering Canadian hair and exceptional calf vigor, keeping newborn calves healthy and strong regardless of weather conditions. Only through a shorter gestation length will you find cattle with his extreme power and yet a calving ease specialist. His carcass EPD's will be compared this year to some of the premier genetics in the breed.

The Bitten females we have calved are extremely nice to be around. You can rest your hand on most of them or reach down to feel an udder to see if the calf has nursed. Udders are beautiful and they are wonderful mothers. I have to take my hat off to

Yukon and Reload as well. Those females are the same way. We don't have EPD's or indexes for a lot of the things necessary for profit. Calf vigor and mothering ability would be at the top of my list. You can trust that those issues along with structural integrity and udder quality, to name a few, have been analyzed and culled appropriately.

We consigned 200 units of Bitten semen to Cattle Visions & 300 units will be sold here. No other semen will be available for the coming breeding season. Thanks Jeff

I can see why everyone is excited about the Werning program!! This guy gives a good look with some added power and hip. Just the versatile type of bull that will improve almost any segment of the beef industry.

25

10 years ago our family set out to invest in the genetic future of our herd, our goal was to increase our herd health and profitability. Our standards were high, and our list of priorities was long. We wanted something to cross our Angus cattle with that would provide growthier, bigger framed calves. We put a high priority on calves to be born with early vigor and thrive in their given environment. We required bulls that were docile in demeanor, held up well and were easy to keep. Not to be overlooked, we also needed service after the sale and a company with integrity that we could trust our livelihood with. Springer Simmentals genetics fit our herd goals. We put our trust in the Springer family and today we exclusively run 10 of their bulls in our herd. The Springer Family has meet and exceeded all our priorities. We attribute our herd success with our decision to partner with Springer Simmentals.

The Tom and Beth McCormick Family

I could write individual comments for the next 4 bulls but the reality is they could be full brothers. That is probably the most exciting part of the Bitten cattle and as a breeder I really appreciate. Consistency of a sire transmits consistency into your calf crop. That puts huge dollars into your pocket. It's unusual to find sires that produce high quality sons AND daughters.

Buy with confidence!

220D offered an outcross to the cows in SD and we decided to make his home there. He was one of the highest marbling, highest growth bulls of that calf crop and is a very complete individual. His sons could be Bitten sons. It's exciting to see the consistency that I talk about exhibited in sons and daughters of his. The 220 calves are extremely laid back and easy to be around. For sale topping feeders or trouble free, high producing replacements, take a hard look at these guys.

Look at the bone, large hooves, hip and muscle that all of these guys possess. They are similar in type and characteristics. Their mothers are peas in a pod and the epd's and individual stats are consistent and similar. I believe that is what a breeding program is!! I believe it is imperative for a consistent high performing calf crop.

Insurance
Equine &
Livestock

Bull Mortality & Infertility Insurance

To protect your investment, Caitlin Insurance will be offered on your livestock purchase. It covers many of the hazards to a bull, including foot rot and injury that mortality insurance does not. We will pay 3% of the premium on your choice of policy, and if leaving your bull until May 1st would require at least the inexpensive policy be purchased. A representative will discuss different options just prior to the sale and answer any questions you may have. Springer Simmentals will continue to warrant your bulls for disposition, sound feet and legs and breeding soundness just as we have in the past. Sincerely, Jeff Springer

Brandon Yardley Family

Steve and I had the opportunity to help Mike and Brandon Yardley families with branding calves this year. My appreciation for ropers has grown exponentially. Pictured are Coy Stovall in the white hat, Lee Grimm, dark hat, and "Big Mike" Yardley on the big sorrel gelding. I swear they could rope a mosquito off of a switching cows tail and just get the back legs. Steve looked like he "shot the moon" when he caught one and a calf was nice enough to finally jump into my open loop. Thanks much to Tyler and Allen McCulley for their patience and training. We really appreciated the hospitality, fellowship and friendship with great people and great cattle.

Coy Stovall in the white hat and Lee Grimm in the dark hat

"BIG Mike" Yardley

Steve

- Tips for additional profits!! -

I love delivering bulls and also stopping in throughout the year to see how the cattle work out. It is mostly for me to learn things and get to know our customers.

BIF reported this year that weaning weights have been stagnant for the last 10 years, yet the amount of creep feed sold has increased exponentially recently.

There are three ways to increase weaning weights that I have come to realize that do not include buying commercial creep feed.

1: When rotational grazing raise the dividing fences so the calves can graze ahead into the next pasture, not the last. It's surprising how fast they learn this. This way the calves get the choice stuff before the cows come in. It increases weaning weights economically but not nearly as much as the dry hay. That lush grass doesn't have a lot of TDN, consequently a lot of the lush grass carries on through their stomach.

2: Creep feed with your own high quality hay. Green, fine hay is as appealing to any calf as purchased creep feed. Put it in a round bale feeder and use a hot wire to keep out the cows and let the calves in. Or spend an hour with your welder and make a creep gate that you can chain between an existing gate and corner post. I saw one made out of broken off steel posts that worked great. Hay gives them the perfect conditioning for maximum selling prices and makes weaning super easy and efficient. This one will give you as much extra weaning weight as any creep feed without getting the heifers too fat.

3: Buy Springer Simmental genetics. We concentrate on cattle that thrive on grass and select for as much weaning and yearling weight as possible without too much frame.

REMINDER: I have a list of buyers looking for feeders sired by our genetics. Please call before you sell them and I will make them aware of the details of when and where you are selling.

Jeff

GW-WBF Substance
Sire of DS Mabel 115D

DS Mabel 115D - Donor dam lots 61-62

Mabel was the high selling female in the 2017 Dickinson Ranch sale. Genetically she ranks in the top 10% for API, top 3% TI, Top 3% Marb and Top 15% YW. She is physically impressive with a beautiful udder. This mating generates extremely high genetic values for many generations. Consider the consistency with multiple generations of top end EPDs'.

- Open Heifers -

The open heifers offered in this division are the March, April calves along with a selection of older heifers. Semen to breed these females goes with them and their offspring can be consigned to our future bull sales. Some of our best cow families are represented and the quality runs deep. Pictures were taken when heifers were first selected and running as a big group. Please view their updated videos on our website! They are all broke to tie and will be great additions to any herd!

The Rosalyn cow family typically produces females and we have not offered many for sale. They are high producing, high quality and mostly baldies. Wish we could keep them all.

Top 25% for API!! The DS Substance bull certainly adds fleshing ability and substance. This female combines those traits with exceptional good looks. She follows the Donella cow family that adds a beautiful hip and lots of muscle. She is complete and is destined to make a positive impact for your herd.

When you study our catalog and realize how many Bitten females have high producing, high quality sons in the sale you will want a really good one for yourself. F234 will certainly get the job done!!

- Bred Cows -

All herdbulls were pulled on July 4th. Cows were ultrasounded on 07/27. The purebred cows selling are bred for March calves and thus will be sold. They are capable of producing herdbulls. The progeny of any PB female in this sale could return in future bull or female sales. They all sell with a unit of semen from any of our herd-sires to breed your females too.

Jon Weaver, Little Sioux Cattle Co., due to health issues, will be dispersing his cows in this sale. At print time the paperwork necessary for inclusion was not yet complete. Watch our website for a supplemental sheet for information as soon as that becomes available.

Marb	-.24	99	Beautiful female that had twins last year. We have daughters,	
BF	-.12	20	so here is an opportunity for you. Bred 06/20 to DS Numbers	
REA	.50	99	530E and confirmed. 530E is named numbers as he ranks	
API	105	95	in the top 1% of the breed for API and top 2% of the breed	
TI	59	99	for TI. He is a good looking bull with a lot more bone hoof,	
			substance and muscle than a typical calving ease bull.	

I have purchased both breeding stock and bulls over the past few years. The disposition has been phenomenal along with excellent calving ease. Knock on wood; I have had great luck thus far. The performance in the sale barn has also been outstanding. I feed out 25 steers every year and the rate of gain has been the best I've ever had. Last but not least; the calves would easily double as club calves. All in all and top to bottom everything has been outstanding!

91 345 Commercial Cow

She didn't take an embryo and you won't tag her calf without her tagging you. Really nice commercial cow with a lot of performance. Bred 06-20 to Trax McClintock E68.

92 630 Commercial Cow

Really nice commercial cow that did not take an embryo, Bred 06-15 to Trax McClintock E68.

93 204 Commercial Cow

I implanted an embryo on 05/14 and she was confirmed pregnant to that date. Then about 2 weeks later she came in heat so I ran E68 in with her. Sleeved her in late August and she was bred on 08/16 to E68. She is a beautiful cow, high producing and coming with her 3rd calf.

94 Y301 Commercial Cow

Bred 03/26 to SAS Meatwagon, cleaned up with Erixon Bitten. Called to AI Date!

Red baldy. Don't expect to eartag her calf or even get of the 4 wheeler. She is a range cow or rangey, however you want to look it. But if you want a huge calf at weaning or possibly a fantastic replacement female this cow really kicks out quality and performance. Check out her All aboard son as lot 16. Bred to SAS Preacher E532, Bitten x SAS Licorice S532 on 04-26. Cleaned up by Bitten until 07/02. Called to AI date!

I'm old enough to know never say never, but after 18 years of Denver, this will probably be our last year to take cattle out. Priorities change and I am enjoying running to Christmas programs much more than rinsing bulls. We have had a great ride and really appreciate all of the effort from everyone that has helped us along the way. Thanks to the Colorado Simmental Association for all of their hospitality and hard work! It truly is the greatest show on earth! We have a number of cattle feeders looking for our genetics, please contact me prior to selling your feeders and I will text everyone that may be interested.

Sincerely, Jeff

T H E B A L L P L A Y E R

*Even though only two,
Everyone already knew,
Has an arm like a cannon,
And a really small shoe!*

*He can dribble a basketball, right-handed or left,
All the while smiling and keeping Grandpa at bay.
He's a natural, for sure.
Others his age, just want to play.*

*Tackle football, you ask? Eli says, "heck, you bet!"
Back up for a run—get ready, get set!
All 28 pounds coming at you like a torpedoing ball,
Heading for 238 pound Grandpa, and a really big fall.*

*But he's caught in mid-air,
Just in the nick of time.
It's tickle time again,
Making everything fine.*

*He can place-kick like a pro,
Or 2-handed punt,
"It's unbelievable" says Grandpa,
And not just a stunt.*

*Throw a football or baseball
With power and muster.
Yet, get up close and his touch is on target
And soft.....the Little Buster!*

*So to the Brewers, Bucks or Packers,
It's not time, just yet.
There are bruises, sprains and maybe a broken finger or two
Little League, Babe Ruth, and a much bigger shoe.*

*There are cattle shows and horseback riding to toughen him up.
Fixing fence, washing cattle, and a pitchfork or broom.
It will make him tough as nails.
Not a fat little pup.*

*Dreams become reality with hard work and goals.
More kicking and punting and passing is in store.
So that Eli's dream becomes a future,
For evermore!*

*They said she's too young.
I said not in the least.
Never a better time
To see all the great beasts.*

*So Denver she's bound.
What a sight to behold.
Pink coat, pink hat, pink jeans, and wow, those boots!
The belle of the ball, among all the old cattle coots.*

*Like sand on the beach
Pink clothes and all,
We covered each other up
With sawdust from our stall.*

*When show day arrived
Everything pink looked supreme.
Paisley grabbed a whip.
Let's fulfill a dream!
The trip to the airport*

*Had Grandpa feeling pretty blue.
Are you staying in the mountains, Grandpa?
Can I stay with you?*

*Off into the sky
In one of those great big birds.
Back home with Mom and Dad
And Grandpa couldn't find words.*

*She'll be back again soon
That you can bet.
She understands at 2, we have lots of goals
So our dreams can come true; she will never forget.*

*Paisley's
First Denver*
